

Construction Update - September 25, 2024

STAGE 1 NEARS COMPLETION!

The previous version of this update that was shared earlier today had an incorrect photo caption. We apologize for the inconvenience!

Over the past few weeks, the contractor continued installing storm sewer infrastructure and completed improvements up to Fremont Way. The contractor also placed temporary pavement in the centerline of Arlington Heights Road from Buffalo Creek to Brittany Lane.

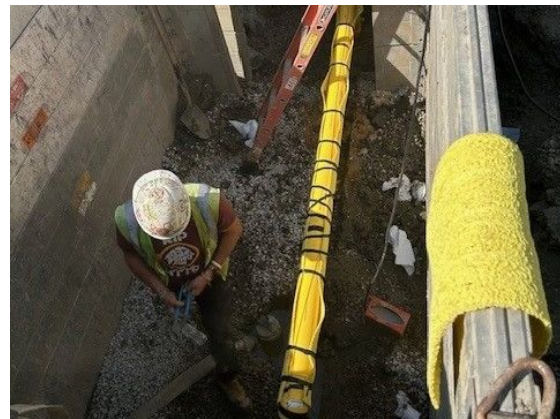

In the coming weeks, the contractor will finish installing storm sewer infrastructure up to IL-83. Meanwhile, utilities are preparing to relocate in anticipation of the Stage 2 phase of the project.

Traffic remains in the two outside lanes with daily shifts as needed for the sewer work or utility relocation. Motorists should expect occasional stoppages of traffic flow when trucks are dumping materials or equipment is moving.

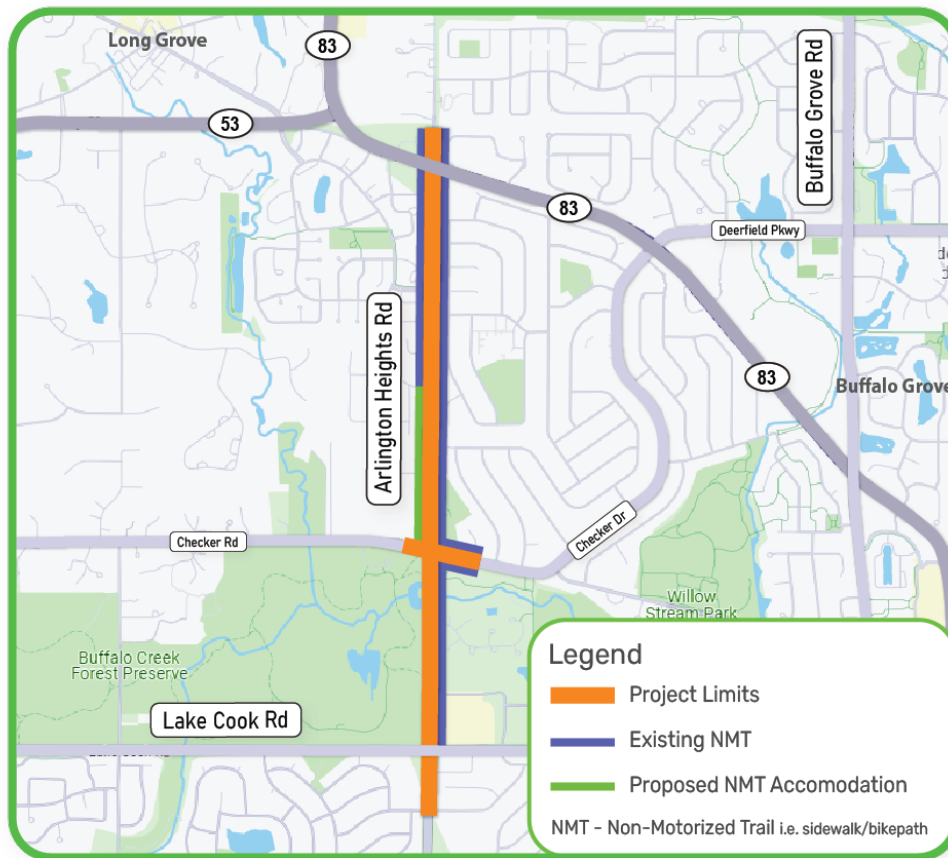

Please use caution when traveling through the area to support a safe work environment.

Temporary pavement

Gas main relocation
