## Construction Update - November 6, 2024

---

### CHANGE IN TRAFFIC THIS WEEK!

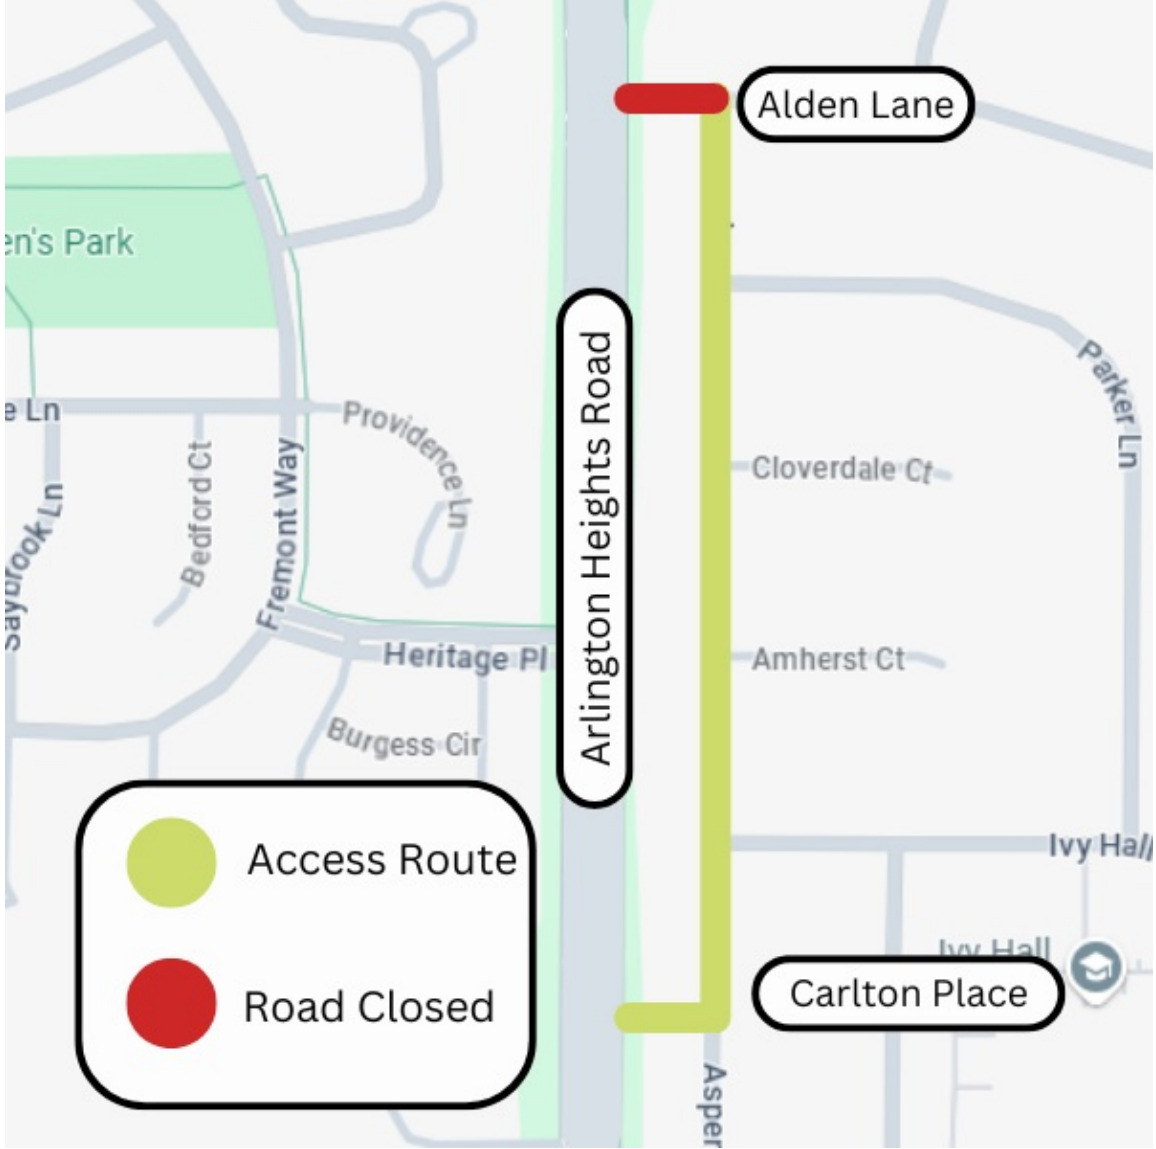

Last week, the contractor completed the watermain crossing and connection at Carlton Place and began improvements for the Alden Lane crossing. The contractor has made great progress and pavement removal is almost complete on the west side of Arlington Heights Road from Lake Cook Road to Checker Road! As part of the project's next phase Stage 2 storm sewer improvements also began at Lake Cook Road.

**This week, a temporary closure will be in place for the watermain replacement. Please note that Alden Lane will be closed from Arlington Heights Road to Aspen Drive. Traffic should use Carlton Place as an alternate route and allow extra travel time through this area.**

The contractor will also continue pavement removal and storm sewer installation between Lake Cook Road and Checker Drive.

When traveling north of Bernay Lane use the two outside lanes of roadway, daily shifts in traffic may occur as needed for the watermain work. When traveling south of Bernay Lane all traffic shifts to the east side of the road.

**Please use caution when traveling through the area to support a safe work environment.**
